# LET'S DO ACCESS

www.fisikal.com

fisikal®

As fitness facilities reopen and adapt to the 'new normal', an efficient operational software will be needed to automatically manage access not just through the front door but also to various areas and activities within the facilities.

Fisikal can manage your member flow and access throughout the physical club environment, granting passage to members with active packages or bookings, and denying access to those without the necessary permissions.

Get the ability to monitor access from any device, at just the touch of a button.

ANTI-PASSBACK CONTROL

Ensure members never lose access to your facility again by throwing out the physical membership cards or wrist bands and welcoming in the new digital era of access control.

Fisikal produces a single-use QR code or barcode, generated in-app to give members and staff seamless club access experience, anytime, anywhere.

STAY DYNAMICALY UPDATED

Simplify your access operations and processes and avoid awkward confrontations between staff and members, by letting the fisikal app do the policing for you.

Access passcodes are automatically updated as new access QR codes or barcodes are generated as and when needed, lasting for a configurable, pre-set time. This means never having to compromise the safety or security of your facility.

INTERNAL ACCESS CONTROL

Facilities can define which areas of a club or studio any member can enter or leave, as well as manage member access to certain areas based on tiered membership packages.

Control entrance, internal and exit door use whilst also overseeing access to the gym, studios, co-working, pool, spa or childcare areas.
