# LET'S OPTIMISE CLASS SCHEDULING.

How amazing would it be to have the digital functionality to be able to manage a team of instructors working across multiple sites to ensure that when schedule changes are needed, gaps are filled quickly and easily with schedule changes updated automatically?

Well, now you can, thanks to the integration of NetGym functionality into the fisikal digital ecosystem.

# WHY AUTOMATE CLASS COVER?

Maintaining a flawless and accurate class timetable requires immense dedication and effort. Unfortunately, there are various circumstances that may prevent an instructor from attending their scheduled class, creating an urgent need for a replacement.

This process typically involves tirelessly reaching out to a long list of instructor contacts, updating spreadsheets, and sending out mass notifications via text, email, or WhatsApp. Not only is this method inefficient, but it also adds unnecessary stress for both the instructor seeking a cover and the timetable manager. Consequently, there is little time left to effectively communicate these changes to class participants.

To alleviate this burden, Fisikal's NetGym integration offers a groundbreaking solution. By seamlessly connecting operators with a closed community of verified and trusted instructors, Netgym automate the process of finding and approving class covers. This ensures swift and efficient instructor replacements, without compromising quality. Moreover, once a cover is secured and approved, the system automatically updates the schedule, guaranteeing that all members are promptly informed of any changes.

# COVER REQUESTS & SCHEDULE UPDATES.

Ensure compliance with custom subbing/coverage policies by digitizing the process and automating updates to the live schedule, saving managers approximately 7-10 hours of manual work per week.

By utilising a filtered sub request process based on formats, location, and availability, coverage can be obtained within seconds, reducing the workload for duty managers/studio coordinators.

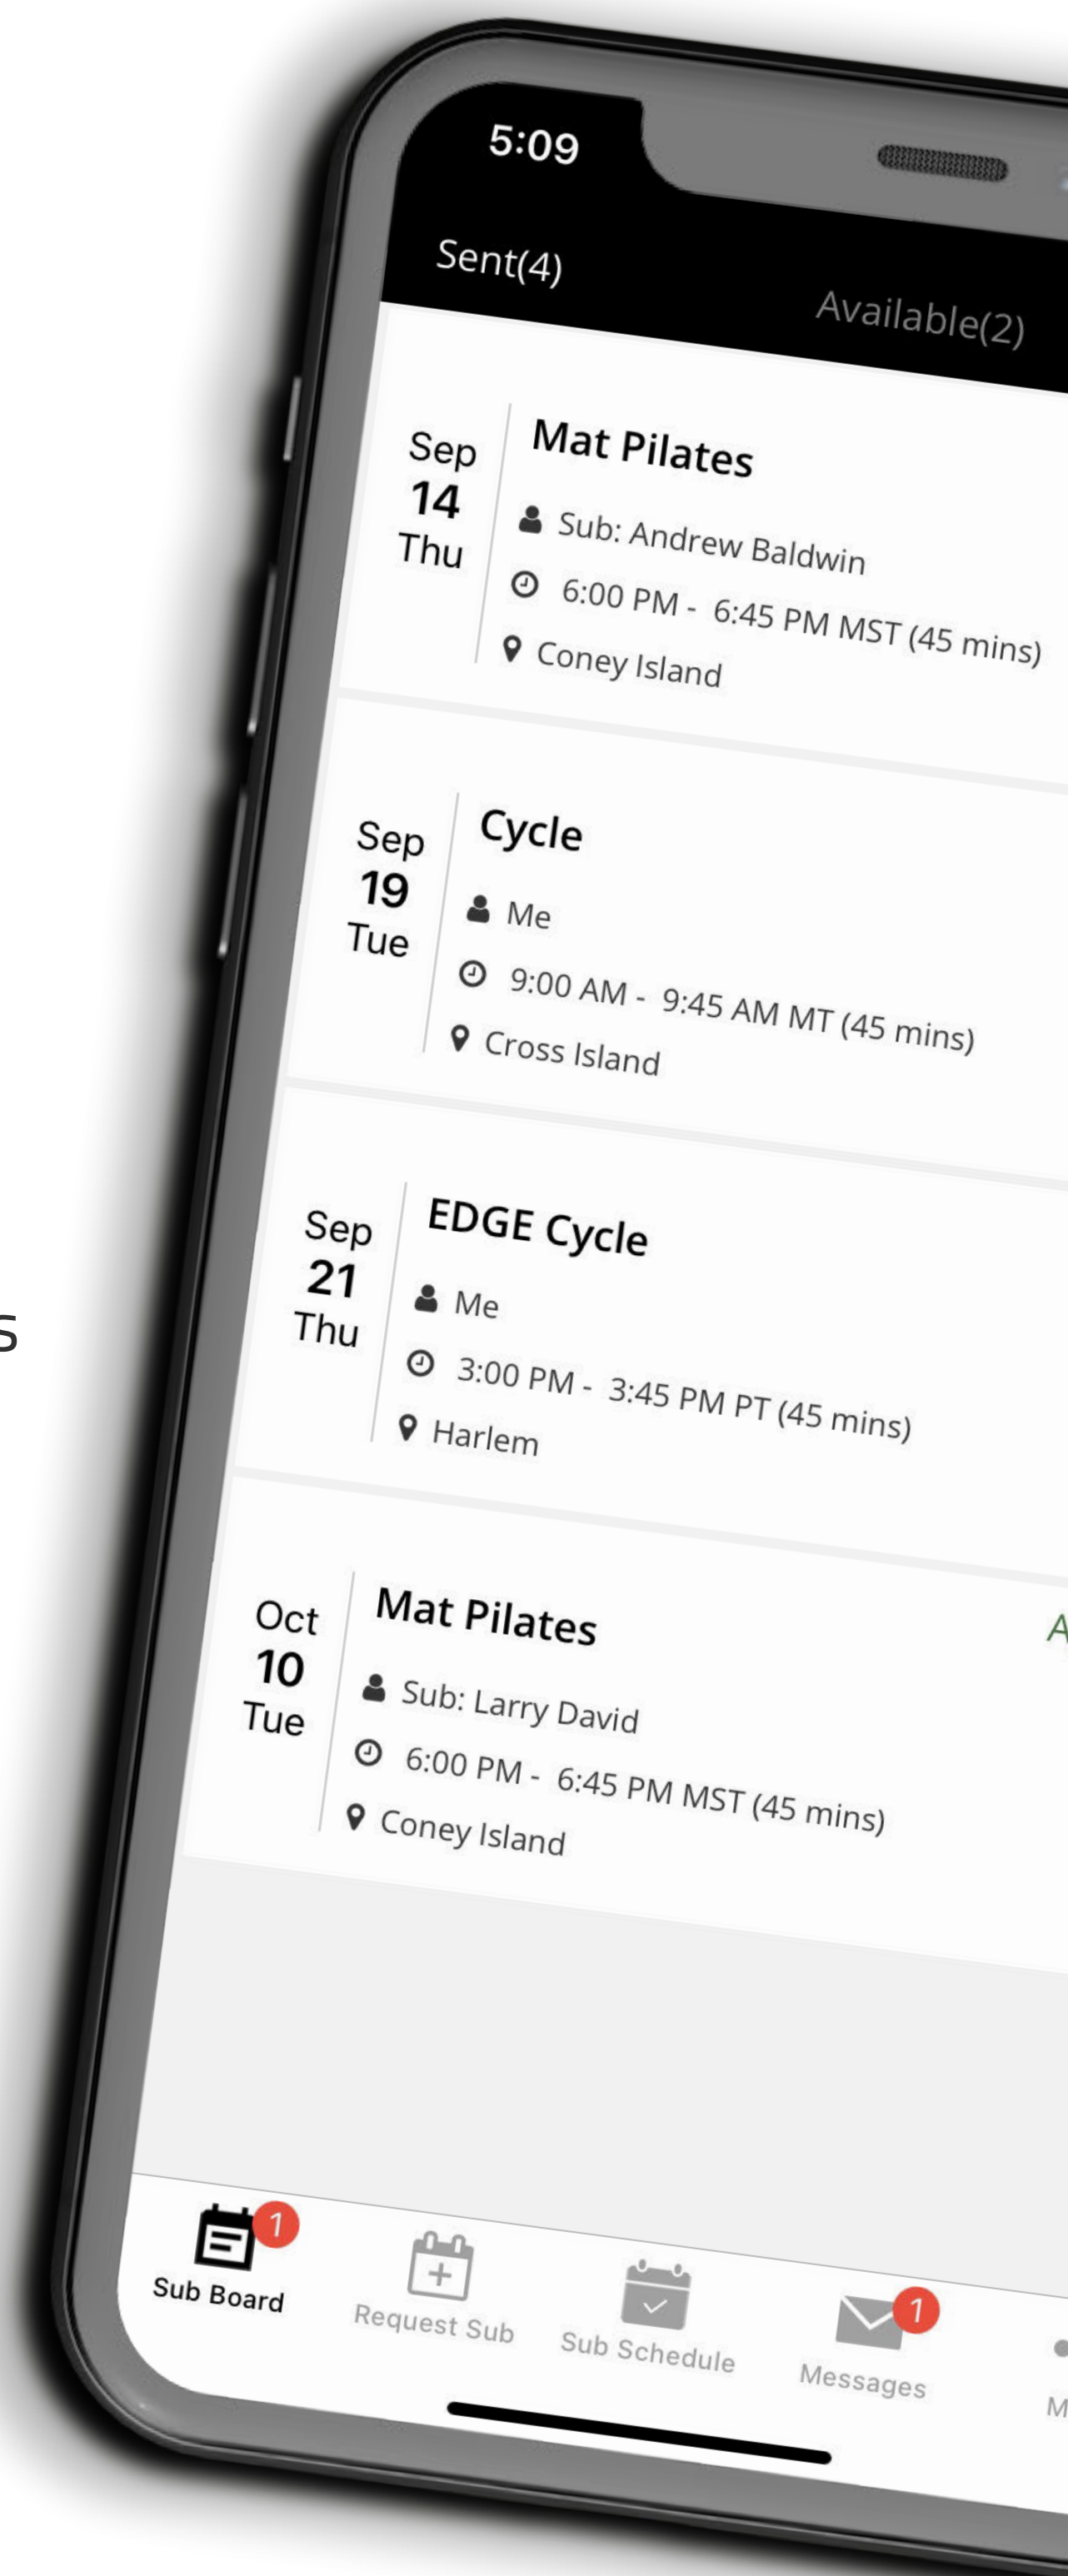

The functionality provides schedule automation, allowing managers to approve subs anytime and anywhere, with automatic updates to the live schedule.

# REMINDERS AND TEAM COMMS.

Automated reminders and consistency helps to eliminate no-shows and possible class cancellations, ensuring an uninterrupted experience for members.

Streamline and filter communications between management and instructors through group and direct messaging. This negates the need for clunky external channels such as Whats App, google sheets and emails, creating a solution that enables efficient and effective interaction. The system also facilitates critical announcements and supports the management of compliance.

# WE ARE HERE TO HELP YOUR BUSINESS.

If you would like to chat through your digital options already included in your package, or how to maximise your digital opportunity in the coming months, please get in touch with us directly via email or phone.
